Introducing the An-Nusrah Foundation System

The An-Nusrah Foundation System is a web-based platform designed to integrate madrasah education management with Islamic donation processes. This innovative solution addresses the challenges of traditional manual systems in Bangladesh, which often lead to inefficiency and a lack of transparency. The platform streamlines Zakat calculation and donation, inspired by the best practices of the As-Sunah Foundation, to ensure a more organized, efficient, and impactful charitable giving experience.

Problem Statement

Manual Student Record Management

Inefficient Monthly Fee Tracking

Lack of Donation Transparency

No Integrated Digital Platform

Objectives of the Project

To develop a centralized web-based management system

To create a structured and transparent donation management system

To automate student information and fee management processes

To implement a Shariah-compliant Zakat calculation feature

Key Features

Responsive Website Design

Donation Management
System

Dual Language support

Student Record Management

Automated Zakat
Calculation

Payment Integration

Resource Requirements

A breakdown of the essential resources needed to develop and operate the donation system.

Hardware

Computer or Laptop

Software

Operating System and IDE: VS CODE

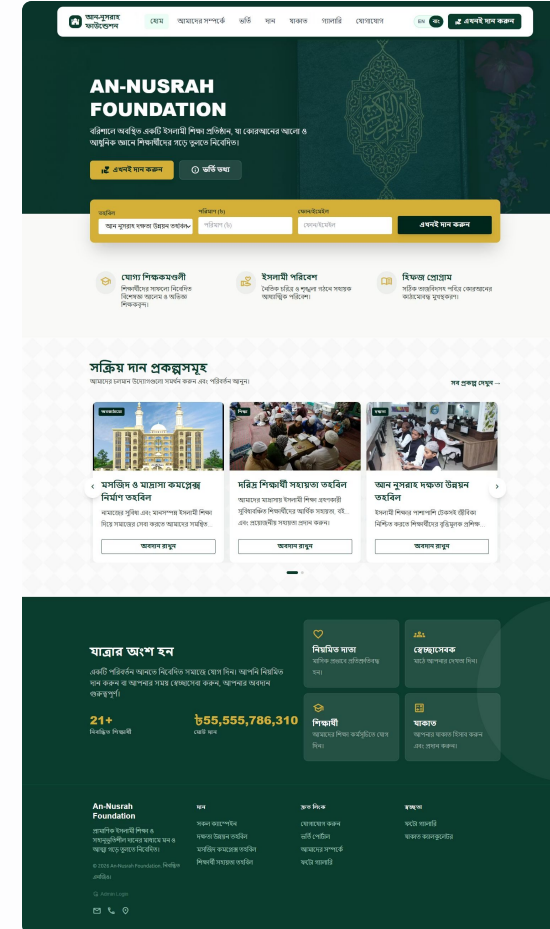

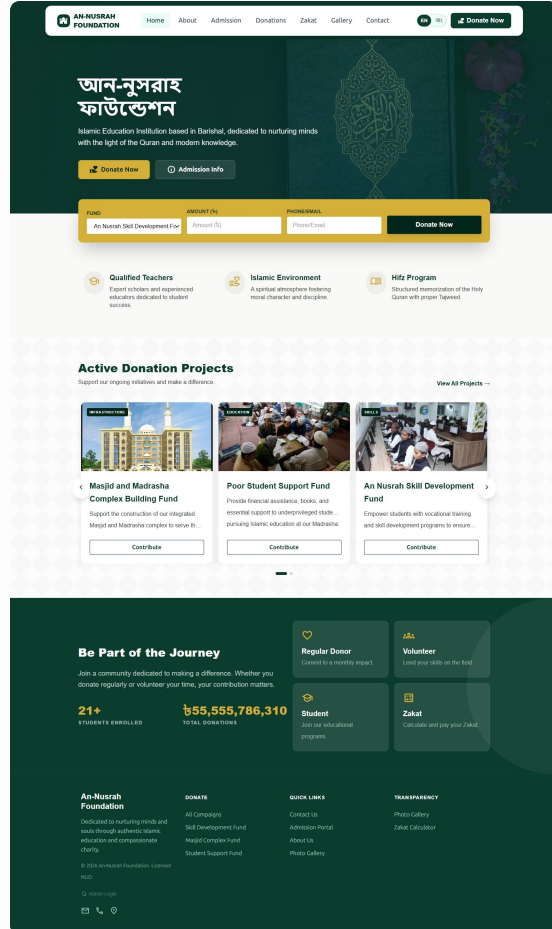

Network

Must have a internet connection

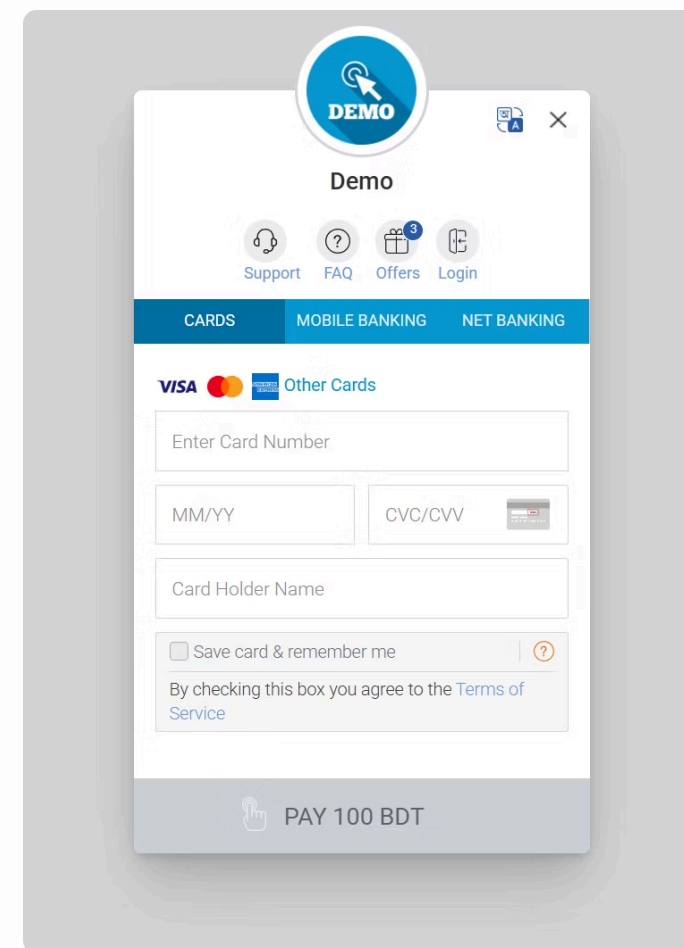

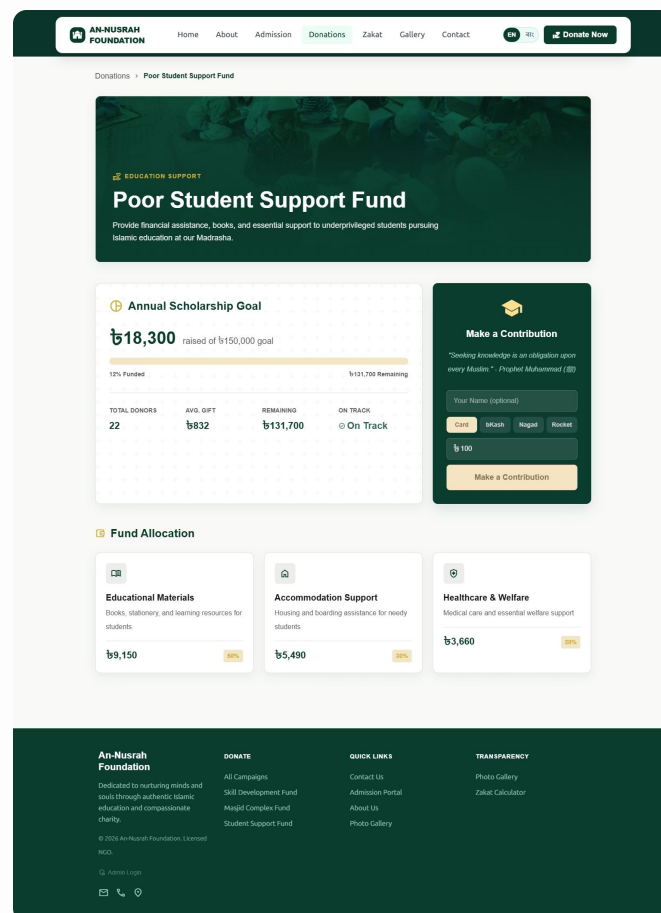

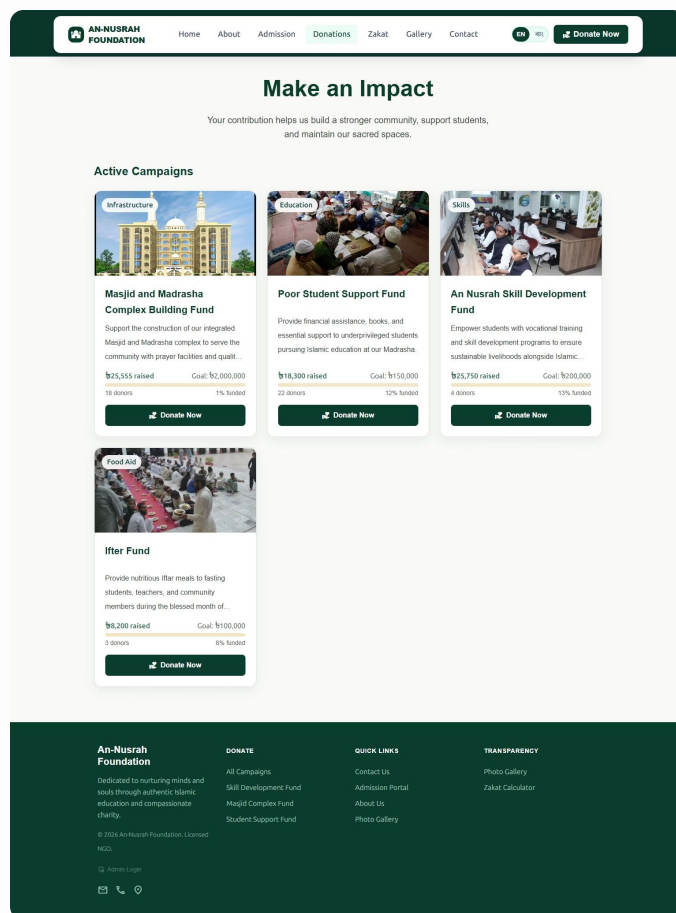

Technology Description

Frontend	React.js, Tailwind UI, Host on Vercel
Backend	Node.JS, express>JS, API Host On Render
Database	Mongodb Atlas
Cloud Storage	MongoDB Cloud
Security	JWET Authetication

Conclusion

Our system is more than just a digital platform; it is a modern solution designed to ensure speed and transparency. Through this project, we have prioritized time efficiency and accurate data management. Moving forward, the integration of a mobile application and an Emergency QR Code will take our service to the next level. We believe this project will eliminate current complexities and create a lasting, sustainable impact.
